

Marcos Frigerio

Fullstack Developer

Electronic engineer with 10 years in industrial automation. Today I build software with React, TypeScript and Node.js for clients in the US and Europe.

Experience

Software Developer - Freelance

Aug 2023 – Present | Client in the US

As a fullstack developer I have taken part in:

- Building new features using React, TypeScript, Neo4j and MariaDB as the main technologies.
- Implementing improvements on an existing website.
- Migrating the database from Neo4j to MySQL.
- Creating scripts to verify and fix the databases.
- Identifying and solving software problems, providing support to the client.
- Deploying new versions of the website using AWS.
- Migrating the UI to Storybook to build reusable generic components.

React · TypeScript · Neo4j · MariaDB · MySQL · AWS · Storybook

Software Developer - Intive

Apr 2021 – Aug 2023 | Projects for clients in the US

I took part in several projects following Scrum, focused on authentication, streaming and blockchain:

- **Open the gate.** Created and modeled objects for a streaming platform using C#, .NET and the MVC pattern.
- **Let them In.** Took part in migrating an authentication process from Auth0 to a new one based on Firebase, using JavaScript as the main technology. Implemented integration tests using Cypress and GitHub Actions. Created a script to read and write in bulk on Firebase. We used Segment to store logs and analyze data.
- **BitGo.** Implemented new features related to crypto assets such as Solana, Near, Avalanche and Algorand, using TypeScript and JavaScript.
- **MAAT.** Developed features in TypeScript and NestJS to audit data using Blockchain technology.

C# · .NET · MVC · Auth0 · Firebase · JavaScript · Cypress · GitHub Actions · Segment · TypeScript · NestJS · Blockchain

Software Developer - Freelance

Jun 2022 – Dec 2022 | Client in Europe

I took part in building a Proof of Concept for a website forum. We used TypeScript, Auth0 and SQLite as the main technologies.

TypeScript · Auth0 · SQLite

Automation Engineer - Renault

Jan 2015 – Aug 2018

As an automation engineer, I was part of the projects office at Renault Team America, where I carried out the following activities:

- Analyzed the existing facilities.
- Prepared technical documentation for the modernization of the paint and assembly plants.
- Supervised suppliers to make sure the Renault standard was implemented correctly.
- Organized and took part in meetings to define solutions that benefit the interests of production, maintenance, safety and engineering areas.
- Provided technical support to production and maintenance once the new facilities were completed.

Automation Specialist - SAMI, AUSI, COMAU, VMC Refrigeración, Freelance

Jun 2011 – Apr 2021 | Clients in Argentina and Brazil

- Programmed PLCs and HMIs on production lines and robotic cells for the automotive, refrigeration and Oil & Gas industries.
- Took part in commissioning production lines at Ford, Fiat, General Motors and PSA Brazil.
- Configured nodes, safety devices, variable speed drives, valve blocks, sensors and actuators.
- Did structured cabling.
- Selected instruments for explosive atmospheres in Oil & Gas projects.
- Drew electrical diagrams and technical documentation using AutoCAD.

PLC · HMI · AutoCAD

Education

Electronic Engineering
National University of Córdoba

Courses

- Curso Completo de Claude Code: Crea Aplicaciones con IA - Udemy
- Maneja DOCKER en 5 días. Mejora como SysAdmin Linux o DevOps - Udemy
- ReactJS Desde Cero - Udemy
- Nest: Desarrollo backend escalable con Node - Udemy
- Typescript: The complete developer's guide - Udemy
- Typescript Operators - Coursera
- Cryptography 1 - Coursera
- Desarrollo Web Full Stack - Acamica
- Posgrado en gestión de proyectos - UTN
- Diplomatura en programación Java - UTN
- Professional Testing Master - UTN
- Diplomatura en administración de empresas - Universidad de Belgrano
- Programador ASP .NET (curso oficial 2310C) - Microsoft
